

# REGELYN C. CACHO

## Full Stack Web Developer

rccacho@gmail.com | github.com/rccacho | regelyn.com | linkedin.com/in/regelyncacho | Alameda, CA | 562-304-8339

### TECHNOLOGIES

JavaScript	Express	Node	MongoDB/Mongoose	git/GitHub
Ruby	Ruby on Rails	PostgreSQL	AJAX	Heroku
HTML5/CSS3	Angular	jQuery	Bootstrap	

### EXPERIENCE

#### General Assembly

##### **Web Development Immersive Student**

**Jan 2017 – Apr 2017**

Completed a 12-week Web Development Immersive program as a full-stack software engineer developing dynamic web applications while problem solving through code, collaborating with other developers and UX designers, and applying computer science knowledge regarding data types and structures.

#### **Projects**

##### Teacher Archives

Developed a web app for Sunday school teachers at Gracepoint's children's ministry where teachers can CRUD messages (sermons) and smallgroup activities (lesson plans).

**Technologies:** Ruby on Rails, PostgreSQL database, Bcrypt gem, Elasticsearch/Searchkick gem, Bootstrap

**Responsibilities:** built full web application from idea to functional product - back-end development and front-end development

##### Doge-Meetings

Developed a dog playdate app where dog owners can set up playdates for their dogs and invite other users' dogs to playdates.

**Technologies:** Ruby on Rails, PostgreSQL database, Google Maps API, Bcrypt gem, Rspec gem, Factorygirl gem, Bootstrap

**Responsibilities:** led relational database diagramming, database creation, set up and wrote rspec tests

##### Vagabond

Developed a web app where food enthusiasts can post comments and reply to other users' comments about food in certain cities.

**Technologies:** Ruby on Rails, PostgreSQL database, Bcrypt gem, Bootstrap

**Responsibilities:** led relational database diagramming, database creation and management, controllers creation and management

##### Middle-Earth Creature Quiz

Developed a web app where users can take a quiz to determine what creature type they are from Tolkien's Middle Earth and receive a madlib based on their creature type and information submitted.

**Technologies:** MongoDB, Express.js, Node.js, AJAX, Bootstrap

**Responsibilities:** wireframing, RESTful routes development, front-end development

#### Bioclinica

##### **Imaging Operations Associate**

**Dec 2014 – Jan 2017**

Managed site communications, generated site and patient reports and queries, and verified reports prior to distribution to sites.

### EDUCATION

#### General Assembly

##### **Web Development Immersive Program**

**April 2017**

#### University of California, Berkeley

##### **B.A. in Integrative Biology**

**May 2011**
