

# REGELYN C. CACHO

## Full Stack Web Developer

[rccacho@gmail.com](mailto:rccacho@gmail.com) | [github.com/rccacho](https://github.com/rccacho) | [regelyn.com](https://regelyn.com) | [linkedin.com/in/regelyncacho](https://linkedin.com/in/regelyncacho) | Alameda, CA | 562-304-8339

### TECHNOLOGIES

JavaScript	Express	Node	MongoDB/Mongoose	git/GitHub
Ruby	Rails	PostgreSQL	AJAX	
HTML5/CSS3	Angular	jQuery	Bootstrap	

### EXPERIENCE

#### General Assembly

*Web Development Immersive Student*

Jan 2017 – Apr 2017

Completed a 12-week Web Development Immersive program to become a full-stack software engineer developing dynamic web applications while problem solving through code, collaborating with other developers and UX designers, and applying computer science knowledge regarding data types and structures.

#### *Projects*

Teacher Archives

Sunday school teacher app specifically designed for Gracepoint's children's ministry where teachers can CRUD messages (sermons) and smallgroup activities (lesson plans).

Technologies: Ruby on Rails, PostgreSQL database, Bcrypt gem, Elasticsearch/Searchkick gem, Bootstrap

Responsibilities: wireframing, relational database diagramming, back-end development, front-end development

Doge-Meetings

Dog playdate app where dog owners can set up playdates for their dogs and invite other users' dogs to playdates.

Technologies: Ruby on Rails, PostgreSQL database, Google Maps API, Bcrypt gem, Rspec gem, Factorygirl gem, Bootstrap

Responsibilities: relational database diagramming, database creation, rspec testing

Vagabond

Foodie web app where food enthusiasts can post comments and reply to other users' comments about food in certain cities.

Technologies: Ruby on Rails, PostgreSQL database, Bcrypt gem, Bootstrap

Responsibilities: relational database diagramming, database creation and management, controllers creation and management

Middle-Earth Creature Quiz

Web app where users can take a quiz to determine what creature type they are from Tolkien's Middle Earth and receive a madlib based on their creature type and information submitted.

Technologies: MongoDB, Express.js, Node.js, AJAX, Bootstrap

Responsibilities: wireframing, RESTful routes development, front-end development

#### Bioclinica

*Imaging Operations Associate*

Dec 2014 – Jan 2017

Managed site communications, generated site and patient reports and queries, and verified reports prior to distribution to clinical sites.

### EDUCATION

#### General Assembly

April 2017

Web Development Immersive Program

#### University of California, Berkeley

B.A. in Integrative Biology

May 2011
