EDUCATION

WEB DEVELOPMENT

2017

General Assembly

BACHELOR OF ARTS: INTEGRATIVE BIOLOGY

2011

University of California, Berkeley

ABOUT

I am a Full Stack Web Developer interested in building beautiful, dynamic web applications to solve problems and help others. I have always been fascinated by puzzles and solving problems. My passion to learn new things and have fun is what drives me.

TECHNOLOGIES

Javascript	Node.js	JQuery
HTML5/CSS3	Angular.js	AJAX
Ruby	MongoDB/Mongoose	Git/Github
Ruby on Rails	PostgreSQL	Heroku
Express.js	Bootstrap	

EXPERIENCE

WEB DEVELOPMENT IMMERSIVE STUDENT

General Assembly | Jan 2017 - Apr 2017

Developed multiple dynamic web applications while problem solving through code, collaborating with other developers and UX designers, and applying computer science knowledge regarding data structures and algorithms.

PROJECTS

Teacher Archives
Developed a web app for Sunday school teachers where teachers can CRUD messages (sermons) and smallgroup activities (lesson plans).
Responsibilities: Built full web application from idea to functional product: utilized Rails and PostgreSQL to migrate database models, create controllers for CRUDing models, and architect RESTful routes, integrated Elasticsearch/Searchkick gem for search bar functionality, utilized Bcrypt gem for security, integrated Jasny Bootstrap for mobile-first front-end navbar design.

Doge-Meetings
Worked in a 4 person team to develop a web app where dog owners can set up playdates for their dogs and invite other users' dogs to playdates.
Responsibilities: Led relational database diagramming, database creation, set up and wrote Rspec tests using Rspec and Factorygirl gems, leveraged Rails framework and Heroku to quickly push a live working application.

Middle-Earth Creature Quiz
Worked in a 2 person team to develop a web app where users can take a quiz to determine their Middle-Earth creature type and receive a madlib.
Responsibilities: Wireframing, architected RESTful API endpoints to support AJAX requests using Express.js and Node.js, utilized Mongoose.js to create database models and schemas, front-end development using Bootstrap, utilized agile practices such as pair programming.

IMAGING OPERATIONS ASSOCIATE

Bioclinica | Dec 2014 - Jan 2017

Worked with teammates to manage site communications, generated site and patient reports and queries, and verified reports prior to distribution to clinical sites.

INTERN/DENTAL ASSISTANT

Alameda Pediatric Dentistry | Feb 2014 - Nov 2014

PRODUCT BUILDER

Penumbra | July 2013 - Feb 2014
